

PRESS RELEASE

WDSGlobal named KPMG Company of the Year

15th December 2009 (Poole, UK):- WDSGlobal has been named KPMG Company of the Year at the Dorset Business Awards 2009. The award is given annually to businesses headquartered in Dorset, UK and recognizes business excellence, strong financial performance and a clear business strategy.

Employing more than 2000 people around the world, [WDSGlobal](#) provides managed services to the wireless industry, specifically to mobile network operators, handset manufacturers and service providers. The company was noted as a market leader, demonstrating excellence in its products and services with a dynamic approach to quality and innovation.

“WDSGlobal continues to enjoy growth across its operations,” explains David Ffoulkes-Jones, CEO of WDSGlobal. “Since 1995 we have been dedicated to helping the wireless industry deliver more profitable products and services to consumers. We have achieved strong growth, international expansion and, despite less than favorable economic conditions, we have more than tripled our global workforce in the last two years. This award is recognition of the hard work that each one of those employees brings to our business each day.”

WDSGlobal is headquartered in Poole, Dorset and operates sites across the USA, South Africa, Dubai, Australia, New Zealand and Singapore. The company counts many of the world’s largest mobile operators and handset manufacturers among its clients.

###

About WDSGlobal

Since 1995, WDSGlobal has been dedicated to helping mobile operators, handset manufacturers and service providers deliver more profitable products and services to end-users. From handset validation and readiness testing to mobile device management and end-user support, WDSGlobal offers the industry’s most complete solution for the management of end-users, devices and services. Believing end-user profitability lies in effective problem prevention and user experience management and not in problem management, the company’s GlobalMine framework continually collects, validates and shares data about devices, services and user trends. This is used to enhance the effectiveness of its carrier-grade products and services and to help customers drive service adoption, increase loyalty and drive-down support costs.
